

CoMet®

Composite Metal **Propane** Cylinder

The CoMet® by AMTROL® is the perfect combination of safety, comfort and style. Its high-strength steel liner, composite winding and plastic outer shell create an ergonomic, attractive design that is lighter, yet stronger than steel cylinders. It's easy to see why the CoMet is quickly becoming the next generation of propane cylinders.

COMET®

Composite Metal Propane Cylinder

The New Wave in Propane Cylinders

With over 30 years of experience manufacturing gas cylinders, AMTROL is recognized as a leader in pressure vessel design and innovation. In this tradition, the CoMet is the next generation of portable LP cylinders. With over one million sold worldwide, the CoMet's patented design features have earned widespread acclaim and won numerous awards worldwide. Take a look inside and see what makes CoMet the next wave in propane cylinders.

Steel Liner

Exclusive steel liner is strong, corrosion resistant and meets strict safety requirements. It's at the center of every CoMet.

- Special corrosion-resistant coating
- High strength steel is impermeable to gas

Composite Core

High-tech fiberwound composite metal core provides an outstanding pressure rating and corrosion-proof barrier. There's nothing else like it.

- Unparalleled strength
- Corrosion-proof material
- Fully-recyclable

Poly Jacket

The CoMet's high density polyethylene jacket is the envy of the propane industry. Designed with your comfort and convenience in mind, it features:

- Large, comfort-grip handles
- A corrosion-proof design that stands up to weather and harsh environments.
- Multiple color combinations and permanent, UV-protected graphics that won't peel.
- Wide, stable base for easy transport and safe use.
- Dent and crack resistant design that withstands rough handling with ease.

Valve

The unique valve is safe and convenient. Industry leading safety devices, plus accurate fuel gauge provide peace of mind and convenience.

- Built-in fuel gauge
- UL listed design
- OPD overfill protection
- Fusible plug for fire safety
- Safety relief prevents overpressurization

The **Ultimate** in Differentiation

In addition to its superb ergonomics, the CoMet's unique poly jacket provides multiple color options and a variety of distinct graphics schemes. Our special In Mold Label (IML) technology integrates the graphics during the molding process, ensuring a durable, long-lasting finish that will look good for years. With additional features like a built-in fuel gauge, stackable design and wide, stable base, the CoMet is changing the way consumers see their portable propane cylinders.

Designed for Today's Market

As an expert in the propane appliance and cylinder market, you understand the advantages of innovation and value-added differentiation. The CoMet is the perfect alternative to steel cylinders and is approved for use in all 50 states and Canada. Your customers will love the look and feel, and you'll be comfortable knowing the CoMet combines style and value with the latest available safety features.
